Legend

tm_1707_ndvi
Value

The NDVI index ranges outputs from -1.0 to 1.0, positive NDVI values that range from 0.6 to 1 are used to denote thick green vegetation, and positive values ranging from 0.1 to 0.5 for less thick or scanty vegetation, while the negative NDVI values are correlated with clouds and water surfaces. ("Normalized difference vegetation index (NDVI);," n.d.)
